Professional Experience

The LEGO Group

Senior Software Engineer - *Copenhagen, Denmark | January 2022 - Present*

- Develop a crowdfunding and crowdsourcing platform at The LEGO Group.
- Collaborated closely with the product team to craft a tailored product experience for high-end LEGO enthusiasts.
- Ensured alignment with project goals and delivered results through innovative solutions.

Siteimprove

Senior Software Engineer - *Copenhagen, Denmark | April 2019 - December 2021*

- Content validation for websites, delivering scalable solutions to enterprise clients.
- Developed and implemented tools to ensure the quality and integrity of website content, enhancing the digital presence of our clients.
- Collaborated closely with cross-functional teams and played a key role in driving efficiency, reducing the gap between product and engineering.

Mono Solutions

Senior Full Stack Developer - *Copenhagen, Denmark | April 2017 - May 2019*

- Engineered and deployed a website generator SaaS solution, customized to address the requirements of small and medium-sized enterprises.
- Integral member of a cross-functional full-stack development team, specializing in backend.
- Contributed to the seamless integration of frontend and backend components, optimizing user experience and driving business growth for our clients.

Serious Games Interactive

Full Stack Developer - *Copenhagen, Denmark | April 2016 - February 2017*

- Created educational games for web and mobile platforms.
- Contributed to engaging learning experiences for diverse audiences.
- Collaborated with cross-functional teams to refine game concepts.

Gesto

Backend and DevOps - *Córdoba, Argentina | January 2014 - March 2016*

As the lead Backend Developer within the startup, I assumed responsibility for the development of APIs and the creation and maintenance of the essential infrastructure.

- Initiated and led Backend development and DevOps operations within a healthcare startup.
- Engineered APIs and maintained foundational infrastructure, focused on IVF clinics.
- Played a pivotal role in establishing the technical backbone of the startup, contributing to its growth and success in the healthcare sector.

Olapic

Backend Engineer - *Córdoba, Argentina | June 2014 - March 2016*

- Made significant contributions as a vital member of the Backend Team, integrating products and databases, ensuring seamless connections and efficient data flow.
- Specialized in API development, fostering smooth service integrations and conducting data analysis to optimize platform performance.
- Worked extensively with social media and user-generated content, catering to large-scale clients with substantial data needs.

Globant

Frontend and Perl Developer - *Córdoba, Argentina | May 2013 - May 2014*

- Initially focused on Frontend UI development for a financial organization, creating user interfaces to improve user experience in a new platform.
- Transitioned into a Perl Developer role, providing crucial support for the operations of a leading South American airline.

Flexxus SA

Delphi Developer - *Córdoba, Argentina | August 2009 - May 2014*

- Spearheaded the maintenance and enhancement of Delphi-based ERP software, ensuring optimal functionality and tailored solutions for small and medium-sized clients.
- Collaborated closely with cross-functional teams to address evolving business needs and enhance the user experience.
